

The beauty of nature. The strength of steel.

Introducing a new line of decorative simulated wood grain steel doors offering a powerful blend of aesthetics with performance. The warmth of wood fused with the strength of steel, built with the highest quality materials and workmanship, Gensteel doors are designed to last for generations.

From embossed 18 or 20 gauge doors with one, two, or six panels, and honeycomb, polystyrene, or polyurethane cores, to flush doors in 12, 14, 16, 18, or 20 gauge, and honeycomb, polystyrene, polyurethane and mineral cores, as well as steel stiffened doors with fiberglass, or rockwool cores... there's a Gensteel product for every design and application.

Advantages over wooden doors

- Available with a fire protection rating of up to 3 hours
- Steel doors will not swell, rot, or warp
- Highly resistant to UV Rays, corrosion, termites, and insects

See reverse for wood grain effects.
