**GENSTEEL DOORS - Wood Grain Specifications.**

Wood grain pre-finish steel doors shall be manufactured by Gensteel Doors Inc.

Doors shall be manufactured using 20, 18, 16, or 14 gage galvanized steel for corrosion resistance.

Doors shall be available as single or pair of doors with or without fire resistance rating.

Wood grain finishing shall be applied using a 3 step proprietary process consisting of an initial pre-treatment of the substrate, followed by a powder coat paint application, and ultimately a wood grain texture sublimation applied using a combination of heat and pressure creating the wood grain finish.

---

Due to the natural characteristics of these finishes, variations in color, tone & grain should be expected.  
Please be sure to ask a representative for a physical sample prior to any final decision.
